Locking Products

All lockable products Storlie Furniture Group sells come with locks and 2 keys. Products will not automatically be keyed alike. For example the PL207 wardrobe ships with a cabinet and pedestal lock, keyed alike.

Laminate Locks

There are two types of laminate locks:
locks for a pedestal (drawers) and locks for cabinet (doors).

FS Metal Locks

All metal files use the same style lock.
To remove lock core you must order FS-CHANGE KEY

Frequently Asked Questions

Can I order a replacement key for lock core number X?

Storlie does not sell individual replacement keys. The best solution is to purchase a new lock core or complete lock.

I have lost my key! I am locked out, help!

The best option is to order a Master Key and replacement lock core. This will allow you to open the lock out and replace with a new secure lock core and set.

My pedestal is locked and I must urgently open, help!

If you must open your drawer and do not have a master key you can drill out the core. You can then replace the damaged lock with a complete lock kit assembly or lock core.

I have a lock core change key but can not unlock my drawer?

FS-CHANGE KEY and PL core removal key will not unlock your item. To open you will need the original key or a master key.

PL cabinet lock cores can be removed when the door is locked, but this will not allow you to open the door, you will still need a master key.

How much does it cost to ship a single lock?
